Sl. No.	Common Facility Centre	Contact Address	Phone Number	Services Offered	How Can be used
1	CFSC Manjery	CFSC Manjery, Pandikad Road, Payyanad Industrial Estate Rd, Payyanad, Manjeri, Kerala 676122	Not Available	CFSC Manjeri provides access to modern machinery and equipment that industries can use on a pay-per-use basis. This includes machinery for different sectors such as manufacturing, fabrication, packaging, and testing. Small businesses that cannot afford to purchase expensive equipment can access these facilities to enhance their production capabilities and improve the quality of their products.	Utilize the services of CFSC Manjeri to access modern machinery, technical expertise, and training. By providing SMEs with affordable access to these services, the department can help them enhance their competitiveness, improve product quality, and grow their businesses.
2	Spices Park Puttady Kerala	Not Available	Not Available	The Spices Park offers modern processing facilities for various spices, enabling businesses to process raw spices and convert them into value-added products like spice powders, extracts, and essential oils. The processing services improve the quality of products and increase their shelf life, allowing businesses to meet both domestic and international demand. The park provides access to infrastructure for packaging, labeling, and branding, which helps spice businesses develop attractive, standardized packaging that appeals to consumers. The packaging services also ensure that spices retain their freshness and quality, extending their marketability.	MSMEs in the spice sector can use the Spices Park's services to access modern processing facilities, packaging infrastructure, and quality control testing. By providing affordable access to these services, the department can help these businesses improve their product quality, increase production capacity, and remain competitive in the market. Organize skill development programs for farmers, processors, and entrepreneurs. Training in sustainable farming, modern processing techniques, quality control, and packaging will help improve productivity and product quality across the spice industry.

3	Spices Testing Laboratory, ICRI Myladumpara	Myladumpara, Idukki District, Kerala.	Not Available	The Spices Testing Laboratory at ICRI Myladumpara plays a pivotal role in ensuring the safety, quality, and competitiveness of spice products.	Encourage local spice businesses to utilize the testing services offered by the Spices Testing Laboratory. By ensuring that their products meet stringent quality standards, businesses can improve their competitiveness both in domestic and international markets. This can help Kerala's spice industry become a leading supplier of high-quality spices worldwide.
4	Rubber cluster, Changanassery	Natural Rubber & Fibre Products Manufacturers Consortium (P) Ltd [NRFPMP] Building No 501/X, Industrial Nagar Changanassery, Kottayam	Tel : +91 481 2724058, 3165441 Mob : 9447791255	Rubber compound mixing unit. Provides facility for mixing the compounds in the required formula. After that the production can be done in the production units of the respective companies.	Guide MSMEs to leverage the cluster's resources, which can help reduce their initial investment costs and enable them to enter the market with minimal infrastructure. Collaborate with the cluster to provide skill development opportunities to the workforce, particularly targeting youth and those seeking employment in the rubber and plastic industries. Use the cluster's facilities to promote innovation, especially in developing new rubber products or value-added products, through joint research and development projects.

6	CFSC Changanassery	Common Facility Service Centre, Department of Industries & Commerce, Industrial Nagar (Post), Changancherry, Kottayam- 686106	Tel : +91 481 2720311 Mob: +91 7907856226	The facilitation center in Changanassery was established with the goal of supporting the rubber and plastic industries. It provides comprehensive assistance to individuals who come with just an idea about a product. The center supports them in everything from collecting raw materials to creating the required molds. For those who lack the basic infrastructure to set up their own production units, the center offers facilities to carry out production by providing raw materials and molds. This enables entrepreneurs to save significantly on infrastructure development costs. They can utilize this facility until they are ready to establish their own independent production unit. The facilitation center operates through five units, which include a production unit, a quality lab, and a training center, among others.	Since this is a place where entrepreneurs can bring their products to market under their own brand name without needing their own production unit, it helps them avoid significant initial investments. All the necessary training is available here, making it highly supportive for the rubber and plastic industries. With a quality analysis lab in place, precise quality testing can also be carried out effectively.

7	Plywood Cluster, Perumbavoor	Perumbavoor Plywood Manufactures Consortium (P) Ltd. SIDCO Industrial Estate Angamaly, Ernakulam 683 573	Tel: +91 484 2458675 Mobile : +91 9349144623	The cluster helps businesses procure high-quality raw materials, including timber, veneers, and adhesives. This ensures that companies have access to the best materials for producing plywood and other wood-based products. Provides access to modern machinery and production facilities for plywood manufacturing. These facilities allow businesses to carry out production efficiently without requiring large investments in expensive equipment.	Can guide MSMEs in the plywood sector to utilize the cluster's resources for affordable access to production facilities, raw materials, and skilled labor. Collaborate with the Plywood Cluster to enhance skill development programs in the woodworking and plywood manufacturing sectors.
8	Rice Millers Cluster, Kalady, Ernakulam	Kalady Rice Millers Consortium (P) Ltd Mattoor - Kalady, Ernakulam - 683 574	Tel: +91 484 2462221 Mob: 94471 55779	Rice Bran Oil Refinery.	Training for value addition is essential, along with the required technology. The aim is to produce value-added products like oryzanol and tocopherol. Additionally, technology is needed to convert the waste byproduct, husk, into fertilizer.
9	Kerala Furniture Cluster, Ernakulam	Kerala Furniture Consortium (P) Ltd Kodanad P.O, Kurinchilakode Perumbavoor, Ernakulam – 683 554	Mob: 98470 01032 Mob: 94477 20484	A facility for manufacturing furniture using raw materials was previously available. Training had been provided earlier, but it was discontinued due to a lack of skilled personnel.	Since there was no one available to responsibly take charge of the center, the work is now being carried out by entrusting it to a third party.

10	Wood Cluster, Perinthalmanna, Malappuram	Valluvanand Wood Consortium (P) Ltd TC 9/246, Kottuvad, Puzhakkattiri Angadippuram P.O., Perinthalmanna (via) Malappuram - 679 321	Mob : 8606403202	A plant that cuts and chemically treats wood is operational. It also processes wood brought in from external sources and converts it into furniture. Training is provided annually to ITI students. Additionally, wood that is pre-cut and brought from outside is chemically treated at the facility.	MSMEs in the wood industry can use the cluster's facilities for affordable access to raw materials, machinery, and production support.
11	General Engineering Cluster, Manjeri, Malappuram	Malappuram Metals & Engineering Consortium Pvt. Ltd. (MECON) Karakkunnu, Pulath Malappuram 676 123	Tel: +91 483 2777501 Mob: 94471 97470	The facility center manufactures gates, grills, and roofing materials. It supports over 800 small-scale entrepreneurs. Production can be carried out either by supplying raw materials to the center or without them.	After COVID, with many entrepreneurs shutting down their industries, the work at the facility has significantly reduced. The company, which has been involved in manufacturing for over 10 years, is operating neither in profit nor in loss. Bringing in modern machinery could help improve operations effectively. Assistance is needed to achieve this upgrade.
12	Wood Cluster, Chadayamangalam, Kollam	Wood Empire Consortium Pvt. Ltd Mini Industrial Area, Chadayamangalam P.O, Kollam 691 534	Tel: +91 474 2475410 Mob: 94954 73421	A plant is operational that cuts and chemically treats wood. It also processes wood brought from external sources and converts it into furniture. Additionally, pre-cut wood brought in from outside is provided with chemical treatment as part of the services.	Although the center is willing to provide training, there has been a lack of positive response from the ITI institutions.

13	North Malabar Offset Printers Cluster, Kannur	North Malabar Offset Printers Consortium Pvt. Ltd. 10/148, Printers Cluster Complex Thankakunnu Road, Thazhe Chovva Kannur 670 018	Tel: 0497 2823399 / 2823322 Mob: 94471 14053	The main focus is on commercial printing. Production is carried out based on the raw materials provided. The center also handles CDP processing, offers designing services, and provides training. Training courses are offered in durations of 2 years and 15 months.	MSMEs in the printing sector can utilize the cluster's facilities for affordable access to printing machinery, raw materials, and technical expertise. Enhance the training programs for workers and entrepreneurs in the printing industry.
14	Wood Furniture Cluster, Taliparamba, Kannur	Malabar Furniture Consortium Pvt Ltd. Ammanappara, C-Poyil P.O., Pariyaram Kannur - 670 502	Tel: +91 460 2204788 Mob: 94465 44454	The cluster provides training programs for artisans, technicians, and business owners in the wood and furniture industry. Offers access to advanced machinery and tools for wood processing and furniture manufacturing.	Collaborate with the Wood Furniture Cluster to enhance skill development in the local workforce. Training programs can be extended to local artisans and workers, improving their craftsmanship and enabling them to adopt advanced production techniques. Promote the use of advanced machinery and technology through the cluster that can help local businesses improve their production efficiency, reduce costs, and produce high-quality furniture that meets global standards.
